## Safety Data Sheet

### Crown Retail Quick Dry Satin

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758 - United Kingdom

#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

##### 1.1 Product identifier

Product name : Crown Retail Quick Dry Satin  
Product identity : 2M4UK10W01  
Product type : waterborne acrylic paint

##### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Field of application : Décoration of trim. Applied by brush. See container for details.  
Identified uses : Consumer applications.

##### 1.3 Details of the supplier of the safety data sheet

Company details : Crown Paints Limited  
PO Box 37, Crown House  
Hollins Road, Darwen  
Lancashire, BB3 0BG  
Tel: 01254 704951  
crownpaint.co.uk

##### 1.4 Emergency telephone number

01254 704951 (08.00-17.00)

Contact Person:  
Product SHE Information Manager  
Regulatory\_Affairs@hempel.com

Date of issue : 19 May 2023

Date of previous issue : 19 May 2023.

#### SECTION 2: Hazards identification

##### 2.1 Classification of the substance or mixture

Product definition : Mixture

##### Classification according to UK CLP/GHS

Aquatic Chronic 3, H412 LONG-TERM (CHRONIC) AQUATIC HAZARD

See Section 11 for more detailed information on health effects and symptoms.

##### 2.2 Label elements

Hazard pictograms :

Signal word : No signal word.

Hazard statements : H412 - Harmful to aquatic life with long lasting effects.

Precautionary statements :

General : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. Do not get in eyes, on skin, or on clothing. IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Remove contact lenses, if present and easy to do. Continue rinsing.

Prevention : Avoid release to the environment.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazardous ingredients : Not applicable.

Supplemental label elements : Contains 1,2-benzisothiazol-3(2H)-one, 2-methylisothiazol-3(2H)-one, 2-octyl-2H-isothiazol-3-one and reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1). May produce an allergic reaction.  
Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.

##### Special packaging requirements

**SECTION 2: Hazards identification**

Containers to be fitted with child-resistant fastenings : Not applicable.

Tactile warning of danger : Not applicable.

**2.3 Other hazards**

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

Other hazards which do not result in classification : None known.

**SECTION 3: Composition/information on ingredients****3.2 Mixtures**

| Product/ingredient name   | Identifiers  | %         | Regulation (EC) No. 1272/2008 [CLP]  | Type    |
|---|--|-----------|--|---------|
| titanium dioxide  | REACH #: 01-2119489379-17<br>EC: 236-675-5<br>CAS: 13463-67-7<br>Index: 022-006-00-2 | ≥10 - ≤25 | Carc. 2, H351 (inhalation)   | [1] [*] |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Biocides deplete naturally or been chemically neutralised during the paint production process. The concentrations shown above, are before this depletion has taken place. Test have been conducted, either on the actual batches or equivalent production batches. These tests show that post-production concentration is below the classification threshold.

**Type**

[1] Substance classified with a health or environmental hazard

[\*] The classification as a carcinogen by inhalation applies only to mixtures placed on the market in powder form containing 1% or more of titanium dioxide particles with aerodynamic diameter ≤ 10 µm not bound within a matrix.

**SECTION 4: First aid measures****4.1 Description of first aid measures**

General : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.

Eye contact : Check for and remove any contact lenses. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. In all cases of doubt, or when symptoms persist, seek medical attention.

Inhalation : Remove to fresh air and keep at rest in a position comfortable for breathing. Give nothing by mouth. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately.

## SECTION 4: First aid measures

|                              |  |
|------------------------------|--|
| Skin contact :               | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion :                  | If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do not induce vomiting unless directed to do so by medical personnel. Lower the head so that vomit will not re-enter the mouth and throat. |
| Protection of first-aiders : | No action shall be taken involving any personal risk or without suitable training.   |

### 4.2 Most important symptoms and effects, both acute and delayed

#### Potential acute health effects

|                |   |
|----------------|---|
| Eye contact :  | No known significant effects or critical hazards. |
| Inhalation :   | No known significant effects or critical hazards. |
| Skin contact : | No known significant effects or critical hazards. |
| Ingestion :    | No known significant effects or critical hazards. |

#### Over-exposure signs/symptoms

|                |                   |
|----------------|-------------------|
| Eye contact :  | No specific data. |
| Inhalation :   | No specific data. |
| Skin contact : | No specific data. |
| Ingestion :    | No specific data. |

### 4.3 Indication of any immediate medical attention and special treatment needed

|                       |   |
|-----------------------|---|
| Notes to physician :  | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| Specific treatments : | No specific treatment.  |

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

|                       |  |
|-----------------------|--|
| Extinguishing media : | Recommended: alcohol resistant foam, CO <sub>2</sub> , powders, water spray.<br>Not to be used : waterjet. |
|-----------------------|--|

### 5.2 Special hazards arising from the substance or mixture

|   |   |
|---|---|
| Hazards from the substance or mixture : | In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products :         | Decomposition products may include the following materials: metal oxide/oxides  |

### 5.3 Advice for firefighters

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard. Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Exclude sources of ignition and ventilate the area. Floors may become slippery. Refer to protective measures listed in sections 7 and 8. No action shall be taken involving any personal risk or without suitable training.

### 6.2 Environmental precautions

Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

### 6.3 Methods and material for containment and cleaning up

Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Use spark-proof tools and explosion-proof equipment. Contaminated absorbent material may pose the same hazard as the spilt product.

**SECTION 8: Exposure controls/personal protection**

|                          |   |
|--------------------------|---|
| General :                | Gloves must be worn for all work that may result in soiling. Apron/coveralls/protective clothing must be worn when soiling is so great that regular work clothes do not adequately protect skin against contact with the product. Safety eyewear should be used when there is a likelihood of exposure.   |
| Hygiene measures :       | Wash hands, forearms, and face thoroughly after handling compounds and before eating, smoking, using lavatory, and at the end of day.   |
| Eye/face protection :    | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Hand protection :        | <p>Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training. The quality of the chemical-resistant protective gloves must be chosen as a function of the specific workplace concentrations and quantity of hazardous substances.</p> <p>Since the actual work situation is unknown. Supplier of gloves should be contacted in order to find the appropriate type. Below listed glove(s) should be regarded as generic advice:</p> <p>Recommended: Silver Shield / Barrier / 4H gloves, nitrile rubber, neoprene rubber, butyl rubber, natural rubber (latex), polyvinyl alcohol (PVA), polyvinyl chloride (PVC), Viton®</p> |
| Body protection :        | Personal protective equipment for the body should be selected based on the task being performed and the risks involved handling this product.   |
| Respiratory protection : |   |

**Environmental exposure controls**

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**SECTION 9: Physical and chemical properties****9.1 Information on basic physical and chemical properties**

|  |   |
|--|---|
| Physical state :                               | Liquid.   |
| Colour :                                       | Various   |
| Odour :  | Non-characteristic.   |
| pH :   | 9 [Conc. (% w/w): 100%]   |
| Melting point/freezing point :                 | 0°C This is based on data for the following ingredient: water       |
| Boiling point/boiling range :                  | Testing not relevant or not possible due to nature of the product.  |
| Flash point :                                  | Closed cup: 75°C (167°F)  |
| Evaporation rate :                             | Testing not relevant or not possible due to nature of the product.  |
| Flammability :                                 | Not available.  |
| Upper/lower flammability or explosive limits : | No specific data.   |
| Vapour pressure :                              | 2.333 kPa This is based on data for the following ingredient: water |
| Vapour density :                               | Testing not relevant or not possible due to nature of the product.  |
| Relative density :                             | 1.19 g/cm <sup>3</sup>  |
| Partition coefficient (LogKow) :               | Testing not relevant or not possible due to nature of the product.  |
| Auto-ignition temperature :                    | Testing not relevant or not possible due to nature of the product.  |
| Decomposition temperature :                    | Testing not relevant or not possible due to nature of the product.  |
| Viscosity :                                    | Kinematic: 280 mm <sup>2</sup> /s                                   |
| Explosive properties :                         | Testing not relevant or not possible due to nature of the product.  |
| Oxidising properties :                         | Testing not relevant or not possible due to nature of the product.  |

**9.2 Other information**

|                          |                        |
|--------------------------|------------------------|
| Solvent(s) % by weight : | Weighted average: 0 %  |
| Water % by weight :      | Weighted average: 58 % |

**SECTION 10: Stability and reactivity****10.1 Reactivity**

No specific test data related to reactivity available for this product or its ingredients.

**10.2 Chemical stability**

The product is stable.

**10.3 Possibility of hazardous reactions**

Under normal conditions of storage and use, hazardous reactions will not occur.

**10.4 Conditions to avoid**

No specific data.

**10.5 Incompatible materials**

No specific data.

**10.6 Hazardous decomposition products**

When exposed to high temperatures (i.e. in case of fire) harmful decomposition products may be formed:

Decomposition products may include the following materials: metal oxide/oxides

**SECTION 11: Toxicological information****11.1 Information on toxicological effects**

The product has been assessed following the conventional method and is classified for toxicological hazards accordingly. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short term and long term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

**Acute toxicity**

| Product/ingredient name   | Result                          | Species      | Dose        | Exposure |
|---|---------------------------------|--------------|-------------|----------|
| titanium dioxide  | LC50 Inhalation Dusts and mists | Rat          | >6.8 mg/l   | 4 hours  |
|   | LD50 Dermal                     | Rabbit       | >5000 mg/kg | -        |
|   | LD50 Oral                       | Rat          | >5000 mg/kg | -        |
| 1,2-benzisothiazol-3(2H)-one  | LD50 Oral                       | Rat - Male   | 670 mg/kg   | -        |
|   | LD50 Oral                       | Rat - Female | 183 mg/kg   | -        |
| 2-methylisothiazol-3(2H)-one  | LC50 Inhalation Dusts and mists | Rat          | 0.11 mg/l   | 4 hours  |
|   | LD50 Dermal                     | Rat          | 242 mg/kg   | -        |
|   | LD50 Oral                       | Rat          | 0.58 mg/l   | 4 hours  |
| 2-octyl-2H-isothiazol-3-one   | LC50 Inhalation Dusts and mists | Rabbit       | 690 mg/kg   | -        |
|   | LD50 Dermal                     | Rat          | 550 mg/kg   | -        |
|   | LD50 Oral                       | Rat          | 69 mg/kg    | -        |
| reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1) | LD50 Oral                       | Rat          | 69 mg/kg    | -        |

**Acute toxicity estimates**

| Route   | ATE value |
|---|-----------|
| No known significant effects or critical hazards. |           |

**Irritation/Corrosion**

| Product/ingredient name      | Result                   | Species | Score | Exposure                             |
|------------------------------|--------------------------|---------|-------|--------------------------------------|
| titanium dioxide             | Skin - Mild irritant     | Human   | -     | 72 hours 300 Micrograms Intermittent |
|                              | Eyes - Severe irritant   | Rabbit  | -     | -                                    |
|                              | Skin - Irritant          | Rabbit  | -     | 4 hours                              |
| 1,2-benzisothiazol-3(2H)-one | Skin - Mild irritant     | Rabbit  | -     | -                                    |
|                              | Skin - Moderate irritant | Rabbit  | -     | -                                    |

**Sensitiser**

**SECTION 11: Toxicological information**

| Product/ingredient name   | Route of exposure | Species    | Result      |
|---|-------------------|------------|-------------|
| 1,2-benzisothiazol-3(2H)-one  | skin              | Guinea pig | Sensitising |
|   | skin              | Mouse      | Sensitising |
| 2-methylisothiazol-3(2H)-one  | skin              | Guinea pig | Sensitising |
| 2-octyl-2H-isothiazol-3-one   | skin              | Mouse      | Sensitising |
| reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1) | skin              | Guinea pig | Sensitising |

**Mutagenic effects**

No known significant effects or critical hazards.

**Carcinogenicity**

No known significant effects or critical hazards.

**Reproductive toxicity**

No known significant effects or critical hazards.

**Teratogenic effects**

No known significant effects or critical hazards.

**Specific target organ toxicity (single exposure)**

Not available.

**Specific target organ toxicity (repeated exposure)**

Not available.

**Aspiration hazard**

Not available.

**Information on likely routes of exposure**

Routes of entry anticipated: Oral, Dermal, Inhalation.

**Potential chronic health effects**

Sensitisation : Contains reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1). May produce an allergic reaction.

Other information : No additional known significant effects or critical hazards.

**SECTION 12: Ecological information****12.1 Toxicity**

Do not allow to enter drains or watercourses. Harmful to aquatic life with long lasting effects.

| Product/ingredient name   | Result                              | Species                          | Exposure |
|---|-------------------------------------|----------------------------------|----------|
| titanium dioxide  | Acute LC50 >100 mg/l                | Daphnia                          | 48 hours |
|   | Acute LC50 >100 mg/l                | Fish                             | 96 hours |
| 1,2-benzisothiazol-3(2H)-one  | Acute EC50 0.11 mg/l                | Algae                            | 72 hours |
|   | Acute EC50 2.94 mg/l                | Daphnia                          | 48 hours |
|   | Acute LC50 10 - 20 mg/l Fresh water | Crustaceans - Ceriodaphnia dubia | 48 hours |
|   | Acute LC50 1.6 mg/l                 | Fish                             | 96 hours |
| 2-methylisothiazol-3(2H)-one  | Acute EC50 0.158 mg/l               | Algae                            | 72 hours |
|   | Acute EC50 0.063 mg/l               | Algae                            | 96 hours |
|   | Acute EC50 0.87 mg/l                | Daphnia                          | 48 hours |
|   | Acute LC50 0.056 ppm Marine water   | Crustaceans - Acartia tonsa      | 48 hours |
|   | Acute LC50 4.77 mg/l                | Fish                             | 96 hours |
| 2-octyl-2H-isothiazol-3-one   | Acute EC50 0.084 mg/l               | Algae                            | 72 hours |
|   | Acute EC50 0.42 mg/l                | Daphnia                          | 48 hours |
|   | Acute LC50 0.036 mg/l               | Fish                             | 96 hours |
| reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1) | Acute EC50 0.018 mg/l               | Algae                            | 72 hours |
|   | Acute EC50 0.1 mg/l                 | Daphnia                          | 48 hours |
|   | Acute LC50 0.188 mg/l               | Fish - Oncorhynchus mykiss       | 96 hours |

**12.2 Persistence and degradability**

| Product/ingredient name   | Test  | Result                       | Dose | Inoculum |
|---|---|------------------------------|------|----------|
| 1,2-benzisothiazol-3(2H)-one  | -   | 90 % - Readily - 28 days     | -    | -        |
| 2-methylisothiazol-3(2H)-one  | -   | 98 % - Readily - 48 days     | -    | -        |
| reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1) | OECD 301B Ready Biodegradability - CO2 Evolution Test | 62 % - Not readily - 28 days | -    | -        |

**SECTION 12: Ecological information**

**12.4 Mobility in soil**

Soil/water partition coefficient (K<sub>oc</sub>): No known data available in our database.

Mobility: No known data available in our database.

**12.5 Results of PBT and vPvB assessment**

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects**

No known significant effects or critical hazards.

**SECTION 13: Disposal considerations****13.1 Waste treatment methods**

The generation of waste should be avoided or minimised wherever possible. Residues of the product is listed as hazardous waste. Dispose of according to all state and local applicable regulations. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Spillage, remains, discarded clothes and similar should be discarded in a fireproof container.

European waste catalogue (EWC) : 08 01 11\*

**Packaging**

Used containers, drained and/ or rigorously scraped out and containing dried residues of the supplied coating, are categorised as hazardous waste, with EWC code: 15 01 10\*.

If mixed with other wastes, the above waste code may not be applicable.

**SECTION 14: Transport information**

Transport may take place according to national regulation or ADR for transport by road, RID for transport by train, IMDG for transport by sea, IATA for transport by air.

PG\* : Packing group

Env.\* : Environmental hazards

**14.6 Special precautions for user**

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**14.7 Maritime transport in bulk according to IMO instruments**

Not applicable.

**SECTION 15: Regulatory information****15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture**

EU Regulation (EC) No. 1907/2006 (REACH) Annex XIV - List of substances subject to authorisation - Substances of very high concern

**Annex XIV**

None of the components are listed.

**Substances of very high concern**

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

Not applicable.

**Other EU regulations**

This product is not controlled under the Seveso III Directive.

**15.2 Chemical safety assessment**

This product contains substances for which Chemical Safety Assessments are still required.

**SECTION 16: Other information**

✔ Indicates information that has changed from previously issued version.

Abbreviations and acronyms :

ATE = Acute Toxicity Estimate  
 CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]  
 DNEL = Derived No Effect Level  
 EUH statement = CLP-specific Hazard statement  
 PNEC = Predicted No Effect Concentration  
 RRN = REACH Registration Number

Full text of abbreviated H statements :

H301 Toxic if swallowed.  
 H302 Harmful if swallowed.  
 H310 Fatal in contact with skin.  
 H311 Toxic in contact with skin.  
 H314 Causes severe skin burns and eye damage.  
 H315 Causes skin irritation.  
 H317 May cause an allergic skin reaction.  
 H318 Causes serious eye damage.  
 H330 Fatal if inhaled.  
 H351 Suspected of causing cancer.  
 H400 Very toxic to aquatic life.  
 H410 Very toxic to aquatic life with long lasting effects.  
 H412 Harmful to aquatic life with long lasting effects.  
 EUH071 Corrosive to the respiratory tract.

**Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]**

| Classification                     | Justification      |
|------------------------------------|--------------------|
| LONG-TERM (CHRONIC) AQUATIC HAZARD | Calculation method |

**UK REGULATORY REFERENCES:**

The products are classified and supplied in accordance with the Chemicals (Hazard Information Packaging for supply) regulations (CHIP). The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks as required by other health and safety legislation. The provision of the Health and Safety at Work Act and the Control of Substances Hazardous to Health regulations apply to the use of this product at work.

**EU DIRECTIVES:**

Dangerous Substance Directive 67/548/EEC. Dangerous Preparations Directive 1999/45/EC. Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC, including amendments. Classification, labelling and packaging of substances and mixtures 1272/2008EC.

**APPROVED CODE OF PRACTICE:**

Approved classification and labelling guide (Sixth edition) The compilation of safety data sheets (Third edition).

**GUIDANCE NOTES:**

Workplace Exposure Limits EH40. Storage of Flammable Liquids in Containers, HS(G)51 Storage of Packaged Dangerous Substances, HS(G)71.

**NATIONAL REGULATIONS:**

The Control Of Substances Hazardous to Health regulations (as amended) The Manual Handling Operations regulations (as amended) The Environmental Protection (Duty of Care) regulations (as amended) The Chemicals (Hazard Information and Packaging) for supply regulations (as amended) The Health and Safety at Work act 1974 (as amended).

**SECTION 16: Other information****Notice to reader**

The information contained in this safety data sheet is based on the present state of knowledge and EU and national legislation. It provides guidance on health, safety and environmental aspects for handling the product in a safe way and should not be construed as any guarantee of the technical performance or suitability for particular applications.

It is always the duty of the user/employer to ascertain that the work is planned and carried out in accordance with the national regulations.
